## How to hack asphalt 8 airborne pc without cheat engine

Home » Asphalt 8: Airborne Asphalt 8: Airborne - Table for Cheat Engine v5.7.1b {Driver Asuna} Total comments: 11 The following tutorials describe how to hack Asphalt 8: Airborne (for credits, tokens, cars, or other valuable game objects) with two methods: Cheat Engine (the easy way) and editing source code (the permanent, hard way). GAMELOFT does not condone cheating and/or hacking Asphalt 8, and will ban players who do so in online events. This tutorial is purely informative and the Asphalt Wiki does not encourage hacking. Users should have decent technical knowledge to use Cheat Engine, and advanced technological knowledge to edit source code. Hacking With Cheat Engine To begin this first method, a user must first download Cheat Engine and install it. After the application has installed, find a preferred Cheat Table from the Internet, according to your game version. A few cheat tables are listed below: Version 4.3.0 Version 4.7.0 Version 5.1.0 Version 5.6.0 (The most recent and reliable version) Double-click the downloaded Cheat Tables - Cheat Engine will recognize the .CT files and run them. After the tables have opened, run Asphalt 8. Go back to Cheat Engine and click the Computer icon at the top left, which will open a new window listing running applications. Find Asphalt8.exe in the Processes tab or Asphalt 8: Airborne in the Applications or Windows tab. Make sure the GAMELOFT logo has ended on Asphalt 8 before proceeding. Depending on your Cheat Table version, the table might have a ">" option or other emphasized text. Check that box. You have now connected to Asphalt 8. You may check other boxes, such as Try All Vehicles, Visible All Vehicles, or No Crash and Asphalt 8 will be affected. Hacking Source Code Hacking source code is an advanced method. Most technical terms will not be explained. You should have administrative access to your computer before proceeding. Proceeding methods detail editing of tracks, cars, and currency in the game. To begin, either (1) Download a pre-existing .zip or .APPX (Windows App Installer) archive of Asphalt 8 from the internet (many can be hard to find, especially old versions) or (2) Find your existing game folder: OS (C:/Program Files/WindowsApps1/ GAMELOFTSA.Asphalt8Airborne\_5.6.1.0\_x86\_0pp20fcewvvtj 2 You now need to give yourself administrative permission over this folder. The following information is for Windows 10, but it is similar for Windows 8. 1) Select the folder, right-click it, and go down to "Properties", 2] Switch to Security Tab in the properties window, and click on the Advanced button at the bottom right. It will open the Advanced Security Settings of the folder. 3] In this window, the current owner, SYSTEM, will be listed with the Change link available (next to the "Owner:" label) Click on it. It will open the Select User or Group window. Click on the available Advanced button again, and then click on the Find Now button. 4] It will list down all the users, and group available on the computer. Select yourself, and click ok, and Ok again. 5] You will be back to the Advanced Security Settings, but the owner will change changed to yourself. There are two additional options you need to check. They will help you transfer the ownership of the sub-folders and files inside it. Replace owner on subcontainers and objects Replace all child permission entries with inheritable permission entries from the object. 1 This is a hidden folder. 2 Parts of this folder path depend on your game version. NOTE: Your Asphalt 8 save files are located in %LOCALAPPDATA%\Packages\GAMELOFTSA.Asphalt8Airborne\_0pp20fcewvvtj\LocalState\ Tutorial 1: Track Hack First off, go to Data\ and find the file pvs.jpk. Open it as an archive and extract china\_track\_eventdef\_chn\_3.pvs. I don't know how to open the file, but it contains the data for a track in China. If it contains code and 3D model data, you can change the code that respawns the player at the Epic Shortcut and remove the columns covering it up. Tutorial 2: Born Villain This tutorial explains how to add the notorious Villain Wheels car back into the game. \*\*\* Now you have access to the files in Asphalt 8. The stuff you really want to mess with is in Data/json. Don't mess with Fake Store.Json (located at the beginning of the folder you copied) because it really is fake, and, in my experience, actually gives you negative credits. Make sure you've removed the app's ability to use the internet before doing this. All the files in /json are in the rare .bson format. You'll need to convert them to json to be able to edit them, so scour the internet for how to do that. GitHub's Bsonools is great for it. After you've modified the json files, convert them back to BSON and launch the game! Details: Asphalt 8 Airborne Cheats and Hacks - Go To: BARLOG.ORG/A8 - Unlimited Credits, Tokens and Stars Generator here A hack may come in different forms. It may come as an installation free program that can only be applied after installation, or it can come as a directly executable program.
